Project Experience

1. FORECASTING WEB APPLICATION

Designed and developed a fully responsive weather forecasting web application using HTML, CSS, and JavaScript, integrating the OpenWeatherMap API to display real-time weather data like temperature, humidity, and wind speed. Ensured smooth user experience across devices by optimizing the UI and implementing robust error handling for invalid city searches.

2. AI-POWERED FINANCE TRACKER

Developed an AI-powered finance tracker application enabling users to record and monitor income and expenses, view interactive spending summaries through dashboards, and obtain AI-generated insights for understanding spending patterns. Designed the interface to be fully responsive and implemented best practices for secure data handling and user privacy.
